

OBSERVATIONS:

Yellow sticky note area for observations.

Plan:

Four horizontal red lines for planning.

Prepare & Maintain:

Seven horizontal red lines for preparation and maintenance notes.

Plant:

Four horizontal red lines for planting notes.

Harvest:

Four horizontal red lines for harvest notes.

SOW & PLANT BY ZONE

Zone 4 can plant fast-growing cool weather lettuces, and plant spinach in cold frames. Zones 5-6 can plant bush beans and squash for the last time this season.

Zones 5-6 can plant bush beans and squash for the last time this season.

Zones 7-8 can sow seeds of corn, cucumbers, squash, and dill in the garden. Set out transplants of tomatoes, peppers, basil, and eggplant for fall harvest. Transplant any indoor seedlings of broccoli, cauliflower, collards, chard, and cabbage into the garden, but be prepared to cover them with shade cloth if temps get above 90 degrees.

INDOORS

Zones 5-6 can start transplants of broccoli, cauliflower, cabbage, and Brussels sprouts.

HARVEST BY ZONE

All climates should harvest anything that is ripe, including beans, chard, cucumbers, eggplant, tomatoes, melons, okra, onions, peppers, squash, and potatoes.
